Comments			
Great to see the team dinner - hope you had fun.			
Didn't consider the feasibility phase.			
Didn't explicitly identify and discuss unit learning outcomes.			
Suggest some structure to identify clearly what worked well, should be done differently, should change in the future, or be done differently.			
Individual reflections can provide different viewpoints, allowing the team to share their personal/individual learnings.			
Satisfactory overview and description of phases - though some are very brief and without extensive reflection.
